

Acknowledgement

The biennial conference, ICON of Indus Hospital & Health Network (IHHN) is a time of spreading knowledge and celebrating our accomplishments through multiple activities including publications. For the 7th Biennial ICON, January 2024, various submissions for publication of our scholarly work were received as original articles, reviews, case reports, and editorials. The work captured in this edition underwent a rigorous peer review process by 53 reviewers - a completely volunteer effort of our esteemed reviewers, for which IHHN and the journal are indebted. Their keen insight and expert opinions made it possible for us to successfully launch this special edition. A sincere thank you again to all our reviewers and administrative support for their generous contributions. Names in italics are of those who did multiple reviews.
